

October 11 - 17, 2002

All instruments are operating in science mode. Work is continuing on preparing for the Deep Space Calibration Review.

Bob Kozon, the Terra Mission Director, successfully coordinated with the Jet Propulsion Laboratory to drop the direct broadcast interference constraints with the Deep Space Network site in Australia to provide the Australian science community with more direct broadcast coverage of forest fires in central Australia.

The Mission Ops Team is planning to upload a Fault detection modification on October 21 in preparation for the last inclination maneuver later this month.
